

At NRG Manufacturing, an AFGlobal company, we know that the products we provide are critical to the efficiency and success of your pressure pumping operations. Because of this, our team of expert engineers, quality control staff, and industry specialists are committed to supplying our valued customers with the best in productivity, service, and support. We provide innovative, superior-quality drilling systems and components and solids management solutions using 3D parametric solid models. Our designs are focused on reliability and ease of operation and maintenance, as well as manufacturability, product performance, and cost-effectiveness.

RELIABILITY

“You’re going to have startup problems, so it wouldn’t be unusual to go out there with someone else’s equipment and average two to three stages a day, whereas with NRG equipment, we could average four to five, sometimes up to six to eight. I can specifically remember a job early on where we were averaging eight stages a day with NRG, which is something that really got my attention.” — **President, US Well Services**

LEAD TIME

“Primarily, NRG was able to support deploying a large amount of equipment in a short amount of time, which allowed us to respond to a growth in the marketplace. They were three to six months faster than any of the competition, which translates into more revenue and allows us to secure more business by expanding into existing shale plays quickly.” — **Engineering Manager, Weatherford**

CUSTOMIZATION

“NRG equipment also offers ease of maintenance and design flexibility. They are open to innovation. If something works better, they are open to meeting the needs of their customers.” — **Maintenance Manager, US Well Services**

CUSTOMER SERVICE

“They are an up-and-coming manufacturer and they handle their business much like we do—they just focus on customer service and taking care of the customer above all else, knowing the rest of the stuff will take care of itself.” — **President, US Well Services**

“Their response time is by far the best of any company that we work with. It’s pretty rare for a company to do, but NRG set up shop right across the street from us to help service our fleets, which goes to show how they value the relationship ProPetro has with them. If we need them to make a field trip to check on one of the pieces of equipment, the response time is near nothing. It’s pretty instant. Our downtime remains minimal, which helps with the success of our company and with their success as well.” — **Fracturing Manager, ProPetro**

FORTY YEARS OF FORWARD THINKING

AFGlobal Corporation is a privately held Houston-based company with a global footprint across nearly 40 facilities on four continents. We provide a broad range of products and services to the offshore drilling, onshore stimulation, and subsea production segments of the oil and gas industry. Our portfolio also supports the general industrial, aerospace, and power generation industries, offering a broad range of both highly engineered and general forged products, as well as complementary aftermarket services.

RELIABILITY

READY WHEN YOU ARE

When it comes to reliability of equipment, NRG offers an advantage unmatched in the industry. At comparable volumes and pump rates, NRG equipment has fewer startup problems, more uptime, and an increased number of stages, with fewer total issues overall. More reliability from us means higher profitability for you.

LEAD TIME

DELIVERING FAST

At NRG, we understand that our speed ultimately determines yours. By streamlining our production process, we get equipment installed and operating quickly, and our comprehensive testing and overall reliability mean that once our equipment is up and running, it experiences significantly less downtime than our competitors. In some cases, we can even expedite delivery of equipment on your timeline, cutting your lead time by days, weeks, even months.

CUSTOMIZATION

SOLUTIONS DESIGNED TO WORK

NRG equipment also offers ease of maintenance and design flexibility, qualities unique in the industry. Always open to innovating and to meeting the diverse needs of our customers, NRG works to design, adapt, or customize our solutions to design solutions that work. From creating an entirely new product to changing the controls on an existing product for better integration with existing equipment, we recognize the importance of understanding our customers and the industry.

CUSTOMER SERVICE

SUPPORT FROM THE GROUND UP

When it comes to standing behind our products, NRG incorporates innovations that separate us from the competition. Whether it's working with our vendors to deliver equipment faster, offering comprehensive support for each initial deployment, or building a new customer service center nearby to offer around-the-clock, on-demand support, NRG consistently works hard to ensure our customers get the best performance from our products.
