PRESSURE PUMPING SOLUTIONS

We Make the Equipment That Makes the Difference

The Resource You Need to Know

For more than 6 years, NRG Pressure Pumping Technologies from AFGlobal has quietly changed the pressure pumping landscape. A different approach to pressure pumping solutions is why our customers are consistently successful in a highly technical, highly competitive market. This is why you need to know us.

The Difference is Service

Service is the most important component of everything we build. From scheduled maintenance to fast, mission-critical field repairs, we have the resources and capabilities to get you up and running with minimal downtime. Sophisticated and proprietary service-report and repair-documentation tools are part of a larger system that builds efficiencies—and maximizes uptime—from processes such as predictive maintenance, scheduled refurbishments, and equipment swapping. We will also provide user training for your personnel, maintenance training and in-field equipment commissioning.

The Difference is Response

A fast response is not enough. It has to be the response you need—accurate answers, short lead times, and a schedule you can trust. And that's what you'll get. For onsite service, our response time from first contact to arrival in the field is an industry benchmark.

The Difference is Uptime

Field maintenance is just one reason why our approach to pressure pumping solutions is different. But it goes much further than that. NRG Pressure Pumping Technologies' systems all revolve around keeping you up and running—and consistently outperforming the competition—with unsurpassed onsite service and tools such as ServiceMax for preventative maintenance.

The Difference is Customization

In a high technology enterprise like pressure pumping, off-the-shelf usually means less than optimum. Collaborating with us means getting pressure pumping equipment that

exactly fits your needs, when you need it. Customized solutions from NRG Manufacturing make the difference in delivering the highest quality pressure-pumping services. From cold to hot weather, and from low to high pressure, we have the answers.

The Difference is Experience

More than 40 years of responding to the needs of our customers with unique and innovative pressure pumping solutions has built an unsurpassed knowledge base. We know what works and what doesn't work. That's a big difference. And, we have the track record to prove it.

The Difference is Opportunity

Upstream oil and gas operations are moving at a faster pace than ever before. Take advantage of opportunities in segments like pressure pumping with high-performance assets that allow you to successfully compete at a high level. We offer proven assets that you can deploy much more quickly than you could before. Assets that come with reliable resources to keep them up and running—and earning.

The resource you need to know

Discover why some pressure pumping companies seem to consistently outperform the rest—they use pressure pumping assets from NRG Pressure Pumping Technologies. We are the resource you need to know. To learn more, contact your NRG representative today. You'll be impressed by our response.
